The Massachusetts Tobacco Cessation and Prevention Program

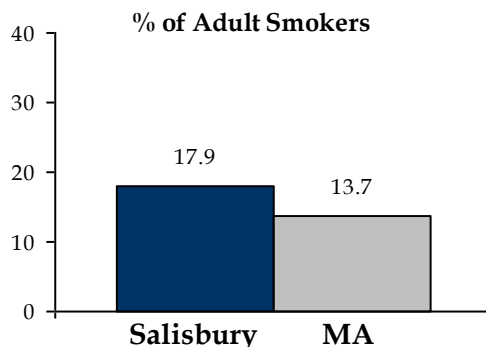

The mission of the Massachusetts Tobacco Cessation and Prevention Program (MTCP) is to reduce the health and economic burden of tobacco use by preventing young people from starting to smoke, helping current smokers to quit, and protecting children and adults from secondhand smoke. The following provides data and information on the impact tobacco use has on your city or town, and the strategies being used in your community to combat these issues.

Cigarette Smoking

An estimated 1,201 smokers live in Salisbury (17.9% of adults, age 18+).

The adult smoking rate is 31% higher in Salisbury than statewide (17.9% in Salisbury compared to 13.7% statewide).

The rate of smoking during pregnancy in Salisbury is 110% higher than statewide (14.3% in Salisbury compared to 6.8% statewide).

Health Effects of Smoking

Evidence has linked smoking to diseases of nearly all organs of the body. The Surgeon General's report concludes that smoking causes: lung cancer, chronic obstructive pulmonary disease or lung disease, coronary heart disease, stroke, diabetes mellitus, rheumatoid arthritis and immune system weakness, increased risk for tuberculosis disease and death, ectopic (tubal) pregnancy and impaired fertility, erectile dysfunction, and age-related macular degeneration. Smoking can also trigger or make an asthma attack worse (2014 U.S. Surgeon General's Report).

In Salisbury, lung cancer incidence is 5% higher among males compared to the state of Massachusetts. Lung cancer incidence in Salisbury is 74% higher among females compared to the state of Massachusetts.

Mortality from lung cancer is 12% higher in Salisbury compared to Massachusetts.

Men who smoke are 23 times more likely to develop lung cancer, and women are 13 times more likely, compared to never smokers (2004 U.S. Surgeon General's Report).

QuitWorks and the Massachusetts Smokers' Helpline

From January 2015 to December 2018, 94 smokers enrolled in QuitWorks, a program for clinicians to refer their patients to the Massachusetts Smokers' Helpline. In addition, 26 people from Salisbury called and completed an intake with the Massachusetts Smokers' Helpline to quit smoking. For more information on how to quit smoking, contact 1-800-QuitNow or talk with your health care provider about the QuitWorks program.

Salisbury, Massachusetts

Updated 08/01/19

Illegal Tobacco Sales to Minors

The rate of illegal sales to minors (those under age 18) is not available for Salisbury. The illegal sales rate in the state of Massachusetts is 7% based on data from fiscal year 2018.

Number of tobacco retail stores

In Salisbury, there are 12 tobacco retailers. The number of retailers in a community impacts the exposure youth have to tobacco industry tactics. An increased exposure can lead to an increase in use of tobacco products.

Considering the population in Salisbury, this is a high number of retailers when compared to the average of other Massachusetts municipalities. For every 1,000 adults living in Salisbury, there are 1.79 tobacco retailers; the Massachusetts average is 1.48.

Regulations in Salisbury addressing tobacco industry tactics

Many municipalities in Massachusetts have exercised their authority to pass local health regulations. The following are policies that have been adopted throughout the Commonwealth to protect youth from exposure to tobacco industry tactics and whether they have been enacted in this community.

Regulation prohibiting the sale of cheap single cigars:	N
Regulation restricting the sale of flavored tobacco products to adult-only tobacco retail stores:	N
Regulation prohibiting the sale of e-cigarettes to minors:	N
Regulation capping the number of retailers with a license to sell tobacco:	N
Regulation prohibiting the sale of tobacco products to individuals under age 21:	Y
Regulation prohibiting the sale of tobacco products in pharmacies:	N

The Tobacco-Free Community Partnership
